

**AMENDMENTS TO THE SPECIFICATION**

**Please delete the present Abstract of the Disclosure.**

**Please add the following new Abstract of the Disclosure:**

The invention concerns a metal laminate containing between two outer metal sheets an adhesive polymer layer, characterized in that the adhesive polymer layer contains a cross-linked polyethylene or a copolymer thereof, grafted with an unsaturated carboxylic acid anhydride and/or an ester derivative thereof. The invention further concerns a process for the manufacture of such a metal laminate and the use of such metal laminates for the manufacture of automotive body parts.
